The Bellame Benefit

BEAUTY FROM WITHIN

Skin - Hair - Nails- Joints - Weight Management*

Collagen comes from the Greek word "kólla," which means glue because it works to hold everything together. It is the most abundant protein in our body and can be found in our muscles, bones, tendons, ligaments, and organs. Skin, as our largest organ, is made up of 75%-80% collagen. At the age of 20, our skin begins producing 1% less collagen every year. The cumulative depletion of this essential protein as we age can be seen and felt from the inside out. Our proprietary formulation powered with patented NATICOL™ Marine Collagen Peptides works synergistically to revive beauty from within, for a glow that really shows.

NATICOL™ Marine Collagen Peptides Type 1 Collagen

This highly purified protein is sourced from sustainably caught fish from Western & Central Europe and produced under strict European guidelines. Daily supplementation of 2,500 mg of NATICOL™ Marine Collagen Peptides is clinically proven to reduce facial wrinkles (Crow's feet/perioral wrinkles) and significantly improve the skin firmness, complexion, and radiance. This patented ingredient is clinically proven to be a natural ingredient for weight management. *

Bovine Collagen Peptides Type 3 Collagen

These peptides are sourced from grass-fed, pasture-raised, bovine in the USA. Supports the body's overall cellular structure by replenishing diminished collagen for improved bone and joint health, strengthen hair, skin, and nails. *

Antioxidants Vitamin A

Promotes healthy skin by fighting free radicals *

Vitamin C

Helps to support the body's natural production of collagen *

Biotin

To support healthy hair, nails, and energy for metabolism *

Proprietary Blend

Combining the powerful benefits of Hyaluronic Acid, Resveratrol, Bamboo Extract, and Baobab Fruit to hydrate, radiate, and plump skin, targeting the appearance of fine lines and wrinkles. Hello, GlowingSkin! *

Naticol® Marine Collagen Peptides

- * Natural, from fish skins, sustainable.
- * Unique collagen peptide profile (enzymatic hydrolysis). Highly absorbed due to its low molecular weight. It is free from fat, cholesterol, gluten and E-number.
- * A very high purity degree of collagen protein: min 93% (> 99,8% on dry matter) > Highly bioavailable and bioactive for the best efficacy.
- * Water-soluble, neutral taste, smell and color (high quality grades).
- * Supported by 2 human clinical studies.
- * Secure and safe from supply chain to finished raw material.
- * Produced in Europe under ISO 9001 and ISO 22000 standards.
- * GMO free/ fat free/ carbohydrate free/ preservative free/ purine free.
- * Safety and good tolerability Naticol ® presented globally a good tolerance.
- * Naticol ® is obtained from enzymatic hydrolysis of the gelatin which is recognized as GRAS (generally recognized as safe).

Clinical Studies, Scientific

Naticol® Marine Collagen Peptides Clinical Study Skin

Results of two dermoclinical studies conducted by CPCAD, Nice hospital, revealed that users of Naticol® fish collagen peptides experienced improvements in skin beauty. Other scientific studies also suggested that ingestion of Naticol® may present benefits in other health areas, such as weight management.

A daily oral administration of 2,5g Naticol ® (fish collagen peptides) reduces facial wrinkles (Crow's feet/ perioral wrinkles), improves significantly skin firmness, skin complexion homogeneity and skin radiance. These are the most recent results obtained from a clinical study conducted by CPCAD/ Hospital of Nice (France) on assessment of Naticol® effects on skin aging signs.

In this double blind, randomized, against placebo study, Weishardt has evaluated the effects of its specific fish collagen peptides (Naticol ®) on skin aging signs, after an oral intake of 2,5g/day, for 8 and 12 weeks.

Clinically proven efficacy this study was carried out on 95 mature women mean-aged 55 years old, randomized in

parallel groups to receive a once a day 2,5g dose of specific fish collagen peptides (Naticol ®) or the placebo for 12 weeks. Skin biomechanics and clinical assessment of the facial wrinkles (crow's-feet and perioral) and skin complexion homogeneity were evaluated.

* SKIN FIRMNESS IMPROVEMENT :

The skin biomechanics results indicated a significant improvement of skin firmness for Naticol ® after 8 and 12 weeks. Clinical score for facial wrinkles (Crow's feet) Clinical evaluation of.

* DECREASE OF CROW'S FEET:

The clinical assessment of the perioral and Crow's feet wrinkles from baseline showed a significant decrease of the mean score of wrinkles at week 12.

* SKIN COMPLEXION AND RADIANCE:

Skin complexion homogeneity was significantly increased for 2,5g/d Naticol ® after Week 8. Same results were obtained about skin radiance after 8 weeks (Naticol ® demonstrated a significant increase).

Conclusion

The latest Weishardt clinical study demonstrates effectiveness of 2.5g Naticol ® /day on skin firmness, radiance and complexion homogeneity. Naticol ® (specific fish collagen peptides) also shows a significant reduction of wrinkles. This new data complements results from Weishardt previous studies proving effectiveness of Naticol ® on skin beauty (firmness, wrinkle reduction...).

JOINT HEALTH

Type 1 collagen is widely present in bones, tendons and ligaments. Naticol® can provide the amino acids which make up collagen in these tissues. Fish collagen peptides may also increase the dietary absorption of calcium. In vivo studies showed benefits of Naticol.

WEIGHT MANAGEMENT

The results of oral ingestion of Naticol® on a daily basis, showed that regular intake of Naticol® Fish collagen peptides may improve the cholesterol levels, help to support normal blood glucose and weight management.. The study objective was to evaluate the effects of an oral intake of Naticol® fish collagen peptides (daily diet containing 2,5% of Naticol®) on body weight composition, serum insulin, glycemia and cholesterolemia.
